

HEAD OF TEAM

Following our guiding principle that an individual design solution must be found for every single customer, our first project step is dedicated to building empathy and understanding.

It is essential to collect knowledge about a company, to identify the needs and to gain the right feel for the implementation of a vision.

Much rather than imposing a certain style upon our customer, far more stimulating for us is the shared development of solutions, in this case with the architectural and construction teams.

Samantha Ritschl-Lassoudry

- _Born on the 20th of January, 1970 in Lorient, France*
